Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1834 edition. Excerpt: . . . foregoing remarks were written, in 1833, some changes liave been made in the method of surveying the public lands to wit: There are to be no random lines for. townships, but all the range lines between them are to be first run north 6 miles, and temporary posts set--then a true east or west line is to be run through the tract, for the boundary of these townships, and the range lines are curtailed at, or extended to, an mtersection with this east or west line. The other tieis of townships are surveyed in the same manner. Random lines are now to be run between that section on the west side of the townships, and the courses corrected back from the corners on therange line, instead of making jjew comers as before. Some other minor alterations have been made. VARIATION OF THE COMPASS. The magnetic...
