Language: English Brand New Book ***** Print on Demand *****.Excerpt from Corporation Finance Distributing Securities Reorganization, Vol. 2 Since the publication of Capitalization in 1912, suggestions have been made from time to time that a discussion in the same general manner of other topics of corporation finance would be helpful to students of the subject. The new volume, Corporation Finance, accordingly, deals more especially with two topics, the distribution of corporate securities and the financial side of corporate reorganizations. It also presents some discussion of the disposition made of corporate income. Though both law and accounting must be referred to in explaining financial matters, I hold an opinion that corporation finance has a distinct channel, and that it is the duty of any one undertaking a presentation of any aspect of the subject to steer a course between the legal and the accounting sides of corporate business. Since writing Capitalization I have changed my mind about the special desirability of using as illustrations existing securities and corporations, and in this second volume have confined the examples mostly to hypothetical cases.
